Notice of Chemical treatment of Eurasian Watermilfoil in Bay Lake

The Bay Lake Improvement Association conducted a Eurasian Watermilfoil survey of Bay Lake earlier this month. We will be treating approximately 31 sites equaling 13.9 acres of Eurasian Watermilfoil in Bay Lake with Liquid 2,4-D as we have used for many years. We expect to conduct treatments the week of June 17th or the week of June 24th weather permitting. As mentioned in the Breezes article and at the annual BLIA meeting we will not be collecting approval signatures any longer. We will assume all approve and allow those who don't want their shorelines chemically treated to opt out of treatments by contacting me at the following addresses or phone number.

If you are OK with the Bay Lake Improvement Association treating along your shoreline for Eurasian Watermilfoil should it need it you don't have to do anything, we will assume you are OK with it.

To opt out of chemical treatments of Eurasian Watermilfoil on your shoreline please call, email, or write David Devins immediately and say so, describing your property by address, fire number (if you know it), Photo from the water and or neighbors on either side of you so we can properly identify your property.
